What to Wear Now

One of the best innovations in golf fashion for women has been the introduction of the Golf Dress. For years we've stepped onto the tennis court in a variety of dresses, but the concept alluded designers of golf wear until recently. This spring try a functional and chic dress that will follow your moves on and off the course – perfect over a bathing suit as well as into the clubhouse after a round.

Two of our favorites are the adorable polo halter and short sleeve dresses from Green Tee Apparel. These flattering dresses skim the body and are made from nanotech performance fabric that wicks away moisture. See these and other styles at a Women on Course Event this spring.

'Fore' Play on the Golf Course

Golf is anything but a smoky bar and definitely where the boys are! It's one sport that men and women can play together. The pace of the game allows for casual conversation and an ideal place to find out what your date is really like. Dating is tough at the best of times. So before you say yes to dinner and a movie, I suggest you 'play around' on the golf course, and see what it reveals.
